

Creative Arts Curriculum

Intent

Curriculum Vision

The Creative Arts provides a powerful means of personal expression through visual communication and develops a confident and independent voice. Passion and personal motivation produces work which is underpinned by knowledge and a wider cultural understanding. Creativity and inspiration are celebrated in the engagement of a range of artistic disciplines including Art, Design, Textiles, Photography, Graphic Design and 3D craft. The physical experimentation and experience of materials, techniques and processes, develop an understanding of the formal elements of art across all disciplines; line, shape, tone, composition, colour, form, texture and pattern as vital components to their own creative work. The Creative Arts engage imagination and stimulate flexibility of mind.

Brave engagement and personal curiosity to explore are encouraged, enabling self-reflection, creativity, personal opinions and independence to make sense of and live within an increasingly visual world. The process of learning and exploring is celebrated and its significance is highly valued, rather than solely the final outcome. Mastery of artistic practical skills is supported through "research through practice" expanding visual literacy, awareness and deep sense of cultural understanding and personal experience. Knowledge and scrutiny of iconic works of art underpin practical skills and a deeper awareness of the semiotics embedded within works of Art.

The creative Arts support a life long journey with deep and meaningful cultural awareness and a confidence to present their progression journey and future lives.

Concepts and Skills

- **Observe and record:** *Look and do, mark making, drawing, photography, capturing the 'essence'*
- **Cultural awareness:** *Gallery visits/exhibitions, exposure to variety of artists work and their context*
- **Formal Elements:** *using and understanding line, shape, tone, composition, colour, form, texture and pattern*
- **Colour and Light:** *Colour theory and physical/emotional impact, painting workshops, observational recording*
- **Perspective:** *Technical drawing, combined compositions, collage techniques, photography, personal viewpoint*

- **Composition:** Placement of images, visual relationships, image and text, creative writing, illustration
- **Accuracy:** Drawing, proportion and scale, technical drawing, textiles, attention to detail, focus, seeing truthfully
- **Resilience:** Growth mindset building on mistakes and developing work over a period of time
- **Explore and respond:** Experimentation and application
- **Independent creative journey:** Having responsibility and motivation to progress, building confidence
- **Inventing:** Own ideas linking to theories and research
- **Describe and analyse:** Visual, writing and speaking skills, analysis of own and others work
- **Refine and reflect:** Pushing the boundaries and possibilities of self, materials and processes, annotation, evaluation
- **Creative problem solving:** Risk taking, logistics
- **Professional practice and industry liaison:** External links, career advice and opportunities
- **Transferable Skills:** Presentation, communication, exhibition and ability to apply a creative mindset
- **Health & Safety:** Appropriate use of material, technique, process and working environment

Vocabulary

Literacy is embedded within the Creative Arts curriculum and keywords are taught and explained confidently in lessons. Students are encouraged to articulate appropriately and also document through their analysis with accurate terminology. Students are expected to be able to annotate their visual work fluently and use this as evidence of recording their wider understanding as well as show detailed evaluation and synthesis of their own and others work. The written component of the Creative Arts subjects are very much an integral part of each Key Stage and embedded within the assessment objectives. Students are encouraged to deepen their use of visual language and work towards mastery in this area; both through creative writing and inspiration, as well as academic rigour to be able to dissect and divulge the semiotics of work linked to them having their own personal opinions. Where cross curricular links are inevitable and encouraged, the consistent teaching and understanding of essential vocabulary is an integral part of the curriculum.

Subject Specific Vocabulary:

Key Stage 3	Key Stage 4	Key Stage 5
Impressionism	Dialogue	Semiotics
Cubism	Intentions	Research through practice
Observation	Research	Engagement
Formal Elements	Experimentation	Audience
Analysis	Outcome	Curation
Annotation	Aesthetics	Installation
Research	Relevance	Synthesis
Collage	Evaluation	Media
Composition	Culture	Personal journey
Illustration	Visual literacy	Industry liaison
Colour	Design	Portfolio
Light	Techniques	Innovative
Environment	Reflection	Disciplines
Perspective	Components	Interconnectivity
Detail	Maquette	Process

"Creativity takes Courage" - Henri Matisse

Homework

All students in years 7-11 have Knowledge Organisers as part of their homework in Creative Arts. The Knowledge Organiser content is in line with the sequencing of the curriculum. Self-quizzing supports

the retrieval of and embedding of knowledge in long-term memory. Our low stakes Do Now's at the beginning of each lesson tests cumulative knowledge of multiple previous topics, giving students the opportunity to strengthen memory through retrieval practice. This is supplemented by our cumulative multiple choice Knowledge Organiser test at the end of each term. Instead of revision being perceived as something which is crammed into a few weeks, our homework programme supports spaced practice throughout each academic year. By repeatedly returning to content covered, students' knowledge has had time to 'rest and be refreshed'.

Students in year 9 also have additional homework to support the creative arts rotation. These tasks incorporate a wide variety of aspects of the curriculum, including primary and secondary research, annotation, ideas development, designing, observational drawing, final outcomes and analysis and evaluation of work as whole.

Students in years 10 and 11 have additional homework in all subjects. Creative Arts homework supports students to develop personal connections to their own artistic development and outcomes and these tasks compliment the structure of lessons. Homework tasks are inseparable and vital part of the final submission and encourage and support the application of higher order thinking skills and a wider cultural understanding. This home learning time also provides insight into individual student's commitment, drive, enthusiasm and passion; which are crucial for progression

Homework helps our students achieve mastery in Creative Arts. Students who need extra support to achieve mastery are supported by our 10:10 programme which covers a range of disciplines within the creative arts and all have access to our daily Homework Club.

Implementation

Overview Statement

The Creative Arts curriculum builds upon the key concepts and skills to aid students over time to excel in their practical application linked to their understanding of both artists, materials, techniques and processes.

All students are supported and encouraged to fully engage with the Creative Arts. Lessons are differentiated with both stretch and challenge as well as scaffolded for students who need further support. The Creative Arts allows students to work at their own pace, and encourages unique and independent outcomes. Students are supported to be able to discuss and explain both the theory behind their work as well as their application of practical skills with appropriate subject specialist vocabulary and disciplinary literacy. Vocabulary is developed in the Creative Arts through the Frayer Model and students are taught to read, write and speak like a creative practitioner.

Students are encouraged to engage with the processes involved in the Creative Arts including drawing, painting, photography, stitch and typography, and are able to connect these different techniques and processes as well as revisit skills sets in order to develop towards mastery. Cross curricular links are explicitly referenced and exploited in order to deepen understanding as well as help students' engagement and motivation with personal projects.

Homework is a fully embedded part of the students learning journey within the Creative Arts, and each aspect supports the students' skills development as well as contextual understanding. Within the Creative Arts, technology is employed in a variety of ways. This includes the use of our digital mac suite, laser cutter and photography facilities. Students are encouraged to experiment with new media to strengthen learning and support their explorations and project development.

In Key Stage 3, students focus on key pivotal artists both historical and contemporary, ranging across disciplines, art movements and cultural and social contexts. Students develop a fundamental skill set and cultural understanding which will support them through life. Students engage with the initial building blocks towards mastery with fundamental artistic skill sets as well as a wider cultural understanding, including the formal elements; *line, shape, tone, composition, colour, form, texture and pattern*. Students learning is supported with external gallery visits to widen their cultural understanding and awareness.

In Key Stage 4, students pursue a deeper personal dialogue with their own creative development and independent learning journey. Skills based subject specialist workshops support students' creative intentions as they better understand the characteristics, properties and effects of using different media, materials, techniques and processes. Students will develop: Research skills, Technical skills, Practical skills, Experimental understanding, Literacy development and visual recording, Personal responses and evaluation of outcomes and documentation of processes. Cross curricular links and environmental, moral, religious, cultural issues and debates are explored. Students produce personal work with dexterity, flexibility and independent competency. Students understand the intentions and deeper meanings behind and communicated through visual arts.

In Key Stage 5, Students make connections and correlations with their prior learning journey to support their progression. Students are exposed to a wide variety of industry and practical contexts in which they may be able to place themselves in the future. Students understand the economic impact of the Creative Arts as an industry. Students are prepared for higher education or the workplace, and to take their place as part of society. Students have the opportunity to engage in a wide variety of specialist disciplines: Fine Art, Graphic Design, Photography, Textiles & Surface Design, Ceramics, Illustration, Visual Communication, Model making, 3D crafts, Applied Arts. Students are encouraged to develop their theoretical and cultural understanding to underpin and support their project work. Students have the opportunity to fully scrutinise theoretical topics in a visual format. Students are also supported with developing presentation skills and oracy, as well as experience of professional practice in terms of exhibition curation and portfolio development. KS5 creates the environment for students to identify their own personal, contextual and conceptual interests which they are then able to integrate into their work. We encourage our KS5 students to take an active role within the Creative Arts department, and be active and evident role models for our KS3 and KS4 students. Our student ambassador scheme has been highly successful and provided opportunities for students to help them as they progress.

Our KS5 offer is the **pinnacle** of our department and curriculum. We pride ourselves on the quality of work and the level at which the students are able to engage with both professional practice as well as a wider understanding of the Creative Arts as a whole, which is what we set out to do as part of our 'vision.'

Impact

Key Stage Three

Through studying the Creative Arts Key Stage Three curriculum, students will be able to develop their observational drawing techniques and evidence their use of both wet and dry media. Students will be able to create personal innovative work and articulate their learning journey and how art and culture are closely combined to create inspiring outcomes. Students will apply ideas development as well

as image generation techniques through photography, collage and textiles. Students have a clear understanding of the key theories/artists and how they link to their outcomes/techniques, be able to explain their influence on their work, which will support them to take creative risks, and start to build confidence and see the relevance of art within today's society.

They will have developed a deep knowledge of the formal elements of art, and be able to apply this knowledge through creating their own personal outcomes as well as in their written analysis and understanding of artists work. Students will understand how to write about the artists/artwork and

link the connection to the theory and the artwork showing their own personal conclusions.

Creativity and Empathy are particularly evident within the creative arts curriculum. Students are encouraged to develop independent ideas and outcomes as well as being able to comment on and critique the work of other artists and their peers. The Creative Arts industry is powered by a love of learning, which is ignited by enthusiasm, and creative ideas, which are encouraged within the curriculum.

Students are able to communicate like an artist through their use of subject specialist vocabulary and a development of disciplinary literacy. All opportunities to develop numeracy are fully exploited in context, such as measuring, the correct use of drawing equipment, and the ratio of colour mixing. This helps students not only embed this learning but also see it within practical context and apply it to how they will use it within society and their daily lives.

Key Stage Four

The Key Stage Four Creative Arts curriculum builds upon students' initial practical and theoretical understanding, extending their knowledge in the areas of Art, Craft & Design, Photography, Graphics and Textiles. Through developing their knowledge of these subject specialisms, they are able to apply their understanding of the formal elements, composition, perspective and accuracy, as well as developing their independent creative journey as they refine and reflect, describe and analyse to develop their creative problem solving skills. Confident to write about artists and their links to theory/context/history in an analytical as well as personal context, while showing an understanding of how their work/concepts/ideas can link to artists and art history.

The Creative Arts curriculum and the industry is underpinned by interdisciplinary links and contacts, which are also evident within the learning to help students engage with and understand the professional context. Students gain awareness of progression opportunities within Creative Arts and this is fully explored and students are supported on their progression journey with additional links with KS5.

Students' progress in the Creative Arts is recognised through their GCSE/BTEC entry, which acts as a benchmark of their mastery and provides them with the national currency needed for access to further education and employment. Students use their knowledge of cognitive theory to recognise and use the most impactful methods of revision and retrieval practice. Creative application to create personal innovative work through a range of disciplines, taking into the consideration the viewer/audience for their work enables the students to gain a sense of self-worth and creative potential. We encourage students to be excited about the subject and keen to learn more/be independent learners Confident to task risks within their work, not being afraid to make mistakes but learning from them.

Key Stage Five

The Key Stage 5 Creative Arts curriculum is the pinnacle of the learning journey for our students. They are able to evidence their understanding, knowledge and practical skills set through a series of subject specialist independent projects. Students are able to engage both with fine art, sculpture, illustration, graphics, photography, textiles as well as other emerging disciplines within the Creative Arts.

Students become deeper thinkers, empowered by their own and others work. The curriculum helps them to be equipped as reflective students and aware of social and cultural issues and be confident, enthusiastic subject specialists.

Each student is able to forge an independent creative journey where they are able to refine and reflect as well as analyse their creative intentions linked to their theoretical understanding. Students are encouraged to consider both social, cultural and moral contexts as well as engaging with the wider audience for their work. This is done through the display and visualisation of final outcomes within contexts and justified through research. Their creative application to create personal innovative work ready for public display is paramount within the learning. Students are able to develop an awareness of industry practice and liaison to support career progression opportunities as well as refining their understanding of the vital importance of the creative arts within our economy. This supports their
