

TBOWA Calculator Policy for new Y7 students

All students must have a **named** scientific calculator. It is part of our essential equipment list and must be brought to school every day. This is a non-negotiable part of our school expectations.

The calculator model we require students to purchase is a

CASIO FX 991 CW

This is a new model (released in 2023) and is one of the best calculators currently on the market. It is designed for use in all exams, from year 7 up to and including A-levels in year 13.

Students need this calculator in order to:

- participate fully in lessons including Maths, Science, etc.
- complete home learning including revision and independent study
- maximise assessment performance

This calculator can be purchased through SQUID cheaper than you will find it elsewhere. We offer a reduced price if students trade in a working CASIO FX991-EX model.
